

Mitey Feathers© Cream – Directions for use (*amateur use - up to 5L*):

A natural topical emulsion suitable for the use in the feather and on the legs of heavy horse breeds for the improvement of the condition to the hair and skin and the repellent of the Chorioptes Bovis mite (feather mite) including all biting lice and flying insects.

Suitable for all skin types; with antiseptic properties.

Emulsion – Ready for use.

1. Only apply the product to dry legs; (if you wish to wash the feather prior to application, it is advisable to do so the day before to avoid locking in any moisture) brush out any loose hair or dirt prior to application (please read below about patch testing).
2. Apply approximately 100ml – 200ml (on all four legs), using a brush or disposable gloved hand. Apply in a back comb motion into the hair, ensuring application on to the skin and into the heels, up to the knee front and back, (apply a small amount directly onto areas of sore skin, scabs, grazes or insect bites).
3. It is advisable to apply the product twice per week for maintenance and preventative measures.
4. It is not a requirement to wash the cream off the skin and there is no need to wash the product out of the feather however, if washing is necessary, it should be left applied as long as possible and a minimum of 7 days.
5. When the time comes to shampoo the product from the feather, it is advised to use warm water where possible, a shampoo purposed for washing horses and that the shampoo be left in the hair for approximately 30 minutes prior to rinsing*

**Keeping the legs dry, will aid with improving the condition of the skin and hair whilst using the Mitey Feathers Cream.*

**Our own Relax and Guard super concentrated and conditioning shampoo is highly recommended for using alongside our Mitey Feathers Cream as it is naturally repelling and also contains antiseptic properties.*

The hair care oils used in Mitey Feathers© Cream including Argan and Cedarwood oils, assist with hair repair and conditioning; contains Vitamin E for skin cell regeneration.

⚠ PATCH TEST

A Patch test is recommended prior to use of this product – Risk of adverse reactions are LOW.

It is recommended that a skin patch test be performed on the person applying Mitey Feathers© and the equine to which it is to be applied, as a precaution, as this will determine if any **adverse reactions** are likely;

Adverse reactions may include itching and a rash; in the event of a reaction; wash off with clean water immediately.

Batch No. 0109 Date: 09/21 HSE.Approval No: 10549

Contains active ingredients; Lavandin Oil (2.0%).
