

## Mitey Feathers© – Directions for use (amateur use - up to 5L):

Oil based emulsion suitable for the use in the feather of heavy horse breeds for the improvement of the condition to the hair and skin and the repellent of the Chorioptes Bovis mite (feather mite), including all biting lice and flying insects.

Suitable for all skin types, including sore, cracked heels and knees, an **accumulation of thickened, crusted scale and scabs** on the front and hind legs of horses; with antiseptic properties.

To act as a barrier between skin and the hair, against the elements.

### Emulsion – Ready for use.

1. Only apply the product to dry legs; (if you wish to wash the feather prior to application, it advisable to do so the day before to avoid locking in any moisture) brush out any loose hair or dirt prior to application (please read below about patch testing).
2. Shake the container before use, use the trigger spray supplied or pour the liquid into a bowl, **PLEASE NOTE – Only a small amount is need and should be applied evenly through the hair and not in large quantities.** Apply approximatley 100ml – 200ml (on all four legs), using a brush or disposable gloved hand. Apply in a back comb motion into the hair, ensuring application on to the skin and into the heels, up to the knee front and back, (apply a small amount directly onto areas of sore skin).  
Use the product to remove any skin debris loose in the horses feather.
3. It is advisable to apply the product on day 1, day 4 and then re-apply on a fortnightly basis for care and preventative measures.
4. It is recommended that where possible, the product be left applied as long as possible before washing out and that it be left in for a minimum of 14 days, however it is not essential to wash out the product at any interval, providing the application instructions have been followed, (please read warnings below regarding sun exposure).
5. When the time comes to shampoo the product from the feather, it is advised to use warm water where possible, a shampoo purposful to washing horses and that the shampoo be left in the hair for approximatley 30 minutes prior to rinsing to help lift the oil (combing throught the hair with a conditioning shampoo will help to clean the feather).

**Our Relax and Guard super conentrated conditioning shampoo is recommended for use alongside Mitey Feathers©**

Mitey Feathers is NOT like using Pig Oil (mineral oil) –

**DO NOT APPLY TOO MUCH!**

It is recommended to apply as if applying hair treatment oil to your own hair, evenly to each strand and across the surface of the skin.

**A natural formulation including: -  
Cedarwood, Argan, Basil and Rosemary oils.  
Vitamin E, Fruit seed extracts and only natural emulsifiers and preservatives; beneficial to sensitive, pink skin.  
Does not contain any silicones or chemicals.**

The hair care oils used in Mitey Feathers© including Argan and Cedarwood oils to assist with hair repair and conditioning; contains antiseptic properties.

### ⚠️ PATCH TEST

It is recommended that a skin patch test be performed on the person applying Mitey Feathers© and the equine to which it is to be applied, as a precaution, as this will determine if any **adverse reactions** are likely;

*Adverse reactions may include itching and a rash; in the event of a reaction; wash off with clean water immediately.*

☀️ Warning! This product is not suitable for use on equines in Temperatures +28 Degrees Celsius, especially on clipped or short haired legs due to the risk of burning.

Batch No.0110 Date: 10/21 HSE Approval No: 10549

Contains active ingredients; Lavandin Oil (2.0%).

**A Natural Registered Pesticide.**

**Mitey Feathers© Directions for use; please read before use.**

1000ml
