

Difference between the Complete Care Package and the Policies and Procedures Package

The **Complete Care Package** is an outstanding set of **downloadable materials** which will be extremely helpful in the administration and management of either a Domiciliary Services or Supported Living Service.

This set of materials is especially useful to those who are establishing themselves in the Industry, and seek to have a quick solution to the problem of creating a comprehensive set of management documentation tailored to their needs.

The documentation, of course, includes a comprehensive set of Policies and Procedures, divided between Operations, Human Resources and Health and Safety.

However, not everyone needs the full set of materials, as they may have been established for some time, but they may be looking to update their Policies and to introduce an up-to-date set.

For these Clients, we have **copied** the Policies and Procedures from the Complete Care Package, and produced a set of Policies and Procedures. In this way you can have a set of Policies without having the expense of purchasing additional items which although very useful, you may not need.
