

Price list effective 1<sup>st</sup> July 2019

To make things simple the price list consists of only six categories, which are as follows:

- |   |        |
|---|--------|
| 1. 446 licence free consumer walkie talkies per pair                | £18.00 |
| 2. 446 licence free PMR walkie talkies, each                        | £24.00 |
| 3. Licensed PMR walkie talkies, no display, each                    | £26.00 |
| 4. Licensed PMR walkie talkies, display and limited keypad, each    | £28.00 |
| 5. Licensed PMR walkie talkies, display and full keypad, each       | £29.00 |
| 6. Digital walkie talkies, all with or without keypad/display, each | £33.00 |

\*\*\* See below

Explanation

Licence free consumer walkie talkies are those that generally come as a pair in a single box, they may or may not come with a charger and rechargeable batteries. Some will need dry cells to power them. I have priced as a pair as it is best if both are sent in, this allows for the working radio to be aligned. The antenna cannot be removed.

PMR licence free 446 radios usually come as a single radio per box with a charger and rechargeable battery. The purchase price will normally be between about £65 and £185 per radio. The antenna cannot be removed.

Licensed PMR radios have detachable antennas as do most digital radios, apart from those that are licence free 446 types. Of course you require an Ofcom radio licence in order to use these radios in the UK, as with other Countries.

Limited keypad with display, the keypad will have a limited amount of buttons, normally excluding numbers. The full keypad radio will include the characters 0 – 9 and perhaps the \* and #.

**Please include Mike Ashby Comms in the first line of the above address. A number of businesses operate from the above site and reception needs to know who the parcel is for.**

The above is for electronic repairs only.

If a new housing is required, we will contact you to quote prior to fitting.

Fixed Price Repair excludes antenna, battery, metal chassis and charging equipment.

Some radios may not be repairable due to liquid ingress, software/hardware issues and PC board damage.

\*\*\* Please note – only mechanical repairs are carried out on digital radios, such as channel, on/off, and PTT switch replacement. Antenna socket, display, speaker and housing replacement are also done. Housings and displays are not covered by the fixed price repair.

UK (Mainland) return shipping is £8.00 per consignment if repairs are under £150.00 and free if repairs are over £150.00. For outside the UK Mainland and EU please contact us for pricing.

We are not VAT registered.

**NB: Please note that where possible, kindly ship radios without batteries (bodies only)**
