

East of Eden Interior and Exterior Living Walls, Dividers and Pictures

Our Living walls add an inspirational new dimension to interiors,
garden rooms, courtyards, balconies and roof gardens

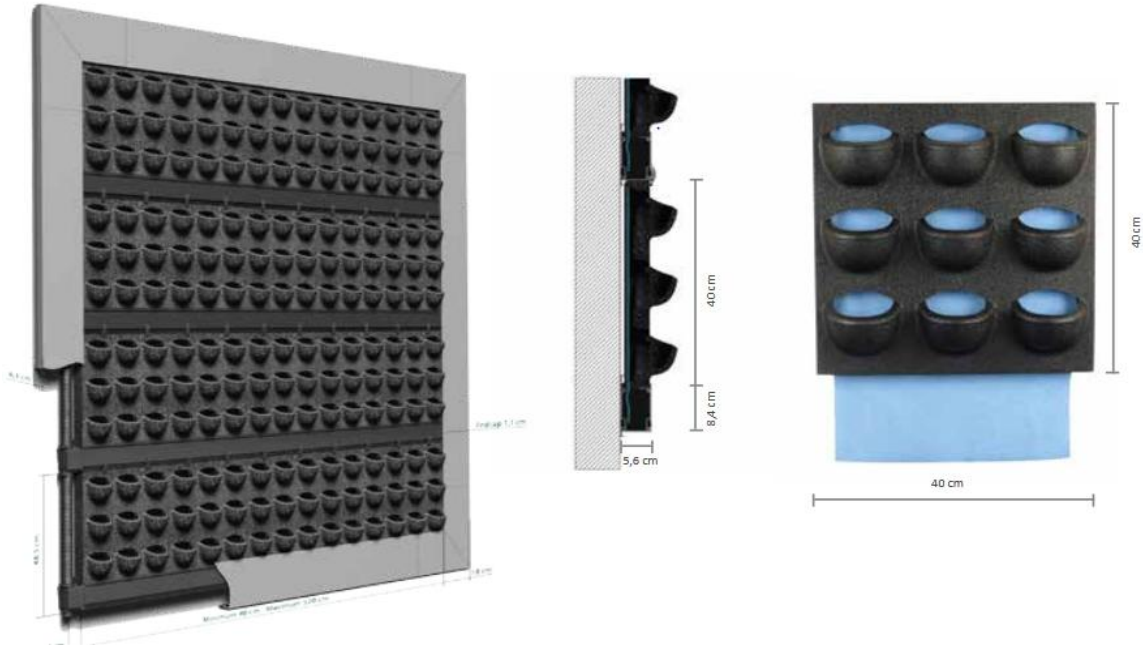

Our Living wall is highly adaptable, because it is constructed of a modular Panel system that is easily adjusted to fit any requirement.

The Living Panel modules have been specially designed to enable you to interchange them at any time of the year. This makes the living wall system ideal for edible walls, or to adapt your living wall to the changing seasons. The volume of growing medium in each pod also enables you to have a permanent wall with no need to replant if that is your preference.

Living Panel System

Both systems that we use are made from adaptable modular units that contain an internal water system, that assures healthy plants and no mess

'LivePanel system easily transforms cold walls into a warm, living surface. LivePanel is a modular living wall system with exchangeable plant cassettes. The cassettes consist of cups in which plants are placed. Each row of cassettes is placed in a duct profile that also serves as a water reservoir. The plants absorb water from the duct via a capillary system

Whether in a waiting area, your favourite room in your house or in an outdoor space, a living wall panel will enhance your sense of wellbeing, as well as purify and refresh the air that comes into your building from the ever increasing toxic fumes that of traffic, industry or even electrical appliances from within built environment.

Advantages of the Live Panel System

- Exchangeable cassettes
- Easy installation and quick assembly: pre-planted cassettes, so little disruption nuisance on project site
- Low water consumption
- Modular system
- Indoor and outdoor application
- Compact construction that takes up little space
- Thermal insulation advantages
- Noise-reducing properties
- Low maintenance
- Low odour
- Contributes to a healthy climate through oxygen production and fine dust capture
- Contributes to biodiversity

Interchangeable pods for outside projects

For the ultimate flexible living wall system for any outside sites we can also install a galvanised grid system and individual pods we can provide

Before and After East of Eden Living wall installation

Close up of vertical planting options

Living walls for larger areas

Based on the easy to install exchangeable cassettes and modular system, there is no limit to your project

Salad and Herb green walls

If desired, all or selected areas of the vertical green wall can be planted with edible herb and salad crops

Extreme Dry Living Walls

Whatever the size of your project, East of Eden Plants can provide you with all aspects of your living wall, from concepts, designs, plants delivered to site, as well as a professional installation team and long-term maintenance.

Commercial and Private installations all receive our specialist attention, combining expert knowledge and our vast range of interior and exterior Design experience.

If required, we can fabricate and incorporate your company logo or personal photographs and pictures, as well as blue tooth waterproof speakers, lighting and other bespoke requirements.

Live Room Divider.

The perfect system to create privacy, reduce noise and environmental air toxins. The Living room divider is adorned with vibrant plants on both sides and provides an aesthetic option for flexibility in how a room or office space is can be used.

Live Pictures

An elegantly simple alternative to the Live Panel system that can bring the benefits of living plants to your home, learning or work environment with our impressive Live Pictures. As well as being able to enjoy the beauty of plants, the Live Picture GO creates a healthier indoor climate, improves air quality and of course it's beautiful too!

Preserved Moss Panels and Pictures

A completely maintenance free option are our Preserved Moss pictures and panels, which are excellent for very low light situations, where live plants will not thrive. Constructed from freeze-dried and preserved, sustainably grown cushion moss, they produce a very striking impact to your living or work space.

Whatever the size of your project, East of Eden Plants can provide you with all aspects of your living wall, designs, support structures and pods, plants, as well as a professional installation and long-term maintenance team.

Please call or email us to help you with your project or if you wish to place an order for a Live or Preserved Moss Picture
