

Mitey Feathers© – Directions for use (*amateur use - up to 5L*):

Emulsion suitable for the use in the feather of heavy horse breeds for the improvement of the condition to the hair and skin and the repellent of the Chorioptes Bovis mite (feather mite), including all biting lice and flying insects.

Suitable for all skin types, including sore, cracked heels and knees.

The formula, holds antibacterial properties, natural cleansing elements and hair conditioning ingredients.

Emulsion – Ready for use.

1. Apply the product to wet or dry legs.
2. Shake the container before use, use the trigger spray supplied to apply the required quantity, the recommended quantity is approximately 100ml – 200ml (on all four legs), using a brush to distribute even coverage. Apply in a back comb motion into the feather, ensuring application on to the skin and into the heels, up to the knee front and back, (apply a small amount directly onto areas of sore skin for relief from itching and inflammation). Use the product to remove any skin debris loose in the horses feather.
3. It is advisable to apply the product on day 1, day 4 and then re-apply on a weekly basis for care and preventative measures.
4. It is recommended that where possible, the product be left applied as long as possible before washing out and that it be left in for a minimum of 14 days, however it is not essential to wash out the product at any interval. Apply safely throughout the seasons, including in the direction of sunlight.
5. When the time comes to shampoo the product from the feather, it is advised to use warm water where possible, and a shampoo purposed to washing.

Our own super concentrated conditioning shampoos are recommended for use alongside Mitey Feathers© including our Coconut, Oatmeal Scrub, Relax & Guard and Peppermint.

This product is also available as a:
