USCG Approval #161.012/50/0

**PERSONNEL MARKER LIGHT (PML)**

**Item #9-80770**  
USCG Approval #161.012/2/1

Personnel Marker Lights (PML®) are activated with a squeeze, causing the casing to slide off, revealing the activated green light stick. PMLs provide 360° illumination and come as a single or double version.

- Double version has an option for warm (greater than 50°F) and cold water (less than 50°F).
- Durations of performance varies with water temperature. Average duration is 8 hours.
- Visible up to 1 nautical mile; 3 miles from the air
- Attaches to PFDs, immersion suits & clothing
- No batteries, non-toxic, non-flammable and no heat emitted
- Lightweight and waterproof
- 4-year shelf life from time of manufacture.

Perfect for: **Personal Identification • Rescue-at-Sea Signal • Man-Overboard Light • Evacuation Signal**

**LIGHTSTICKS**

SnapLight® LightSticks provide portable, reliable light that is easy to activate with a bend, snap and shake. Produces no heat or sparks and is non-toxic and non-flammable. LightSticks are individually sealed in foil.
