

When Safety Depends on Light...

Trust the ORIGINAL and the BEST!

There are suppliers who illegally use our protected brand names and try to imitate our formulations. Cyalume Technologies defends its trademarks, patents, and will engage in legal actions against all who infringe our rights. **This document will help our partners highlighting arguments to counteract cheap competition products.**

Cyalume's PHTHALATE-FREE LightSticks

Phthalates are industrial chemicals found in everyday products and widely used by other lightstick manufacturers. Several phthalates have been banned from use due to health concerns, as they have been found to disrupt the endocrine system, damage human reproductive systems and even cause cancer.

At Cyalume Technologies, we have a strong commitment towards sustainable development by producing greener and safer products. All of Cyalume's products are 100% Phthalate-Free with patented formulations.

Cyalume® Chemical Light Products

SOLE AUTHORIZED SUPPLIER FOR NATO FORCES

Cyalume® is the sole manufacturer authorized to display NATO Stock Numbers (NSN) on its ChemLights.

MADE IN FRANCE & USA

Cyalume Facilities are based in Aix en Provence and West Springfield, MA. Guarantees of stock availability and quick delivery. Our customer service team stands ready to provide quality service.

PHTHALATE FREE, NON-FLAMMABLE

- Our products are 100% Phthalate Free with a patented formulation. All of our products are DBP-FREE.

Other Chemical Light Products

Product with pending or commercial NSN may not achieve quality standards. Contact us for specific support on Military Tenders.

Manufacturing place: Made in China or Mexico
Can you afford a longer delivery time?

- DBP (Dibutyl Phthalate) contained in lightsticks produced in Asia, is listed as a substance of extreme concern and is banned in the European market.

- To find out if a product contains Phthalate and Alcohol substances, check the product's MSDS.

Safety is imperative to professionals such as Miners or Offshore Maintenance Technicians. It's vitally important to have a safe chemical light source. Will you take a risk when lives depend on light?

Do you even have the address of the manufacturer?

Any distributor or reseller is considered responsible in case of an incident or a control from the customs authorities enforcing the REACH directive. Do you have any certificate?

MSDS are often issued by the manufacturers themselves (or even copied from Cyalumes') and not compliant with EU regulation. Make sure they supply you with an MSDS in 16 points made by an agreed body.

Announced is a shelf life between 2 and 4 years without any guarantee.

Performances remains unclear: most of the durations are from 6 to 8hrs, but without any guarantee!

CE MARKING

The CE marking (EN71) is a European standard requirement for toys. In the EU it is forbidden to mark the EN71 CE for toys on items not sold to a public of children. Are you selling novelty/ children's products to safety professionals?
